THE GRADE POINT AVERAGE SYSTEM

Students' grades are marked on a scale of 100. The values are between 0 and 100, and the passing grade is 60. Grade Points are not assigned for the marks above 60. Students are only ranked as "pass" and "fail" in each course.

Grade Point Average formula is as blow:

$$\text{GPA} = \frac{\sum_{i=1}^n \text{Grade}_i \times \text{CreditPoints}_i}{10 \times \sum_{i=1}^n \text{CreditPoints}_i}$$

n: The number of qualified courses

Grade Point Average (weighted) is calculated on a 10 scale, and GPA will be between 6 and 10, not assigned for each grade awarded.

Hereby certify.
